

Our Extreme Clean Commitment:

Cleaning, Disinfecting, Distancing and Protection

To ensure best practices are followed for our passengers and drivers, we require the following:

- In order to board the bus, all passengers must wear a face covering that covers your nose and mouth. Passengers without a covering will not be permitted to board. Trans-Bridge Lines requires face coverings to be worn while boarding, in route, and deboarding our motorcoaches or as directed by federal, state and local agencies.

- Passengers are not permitted to occupy the first 4 seats in the coach (seats 1-4), unless instructed by Trans-Bridge Lines management.
- Passengers are required to occupy seats as directed by the motorcoach driver and/or Trans-Bridge Lines management.

- Use respectful distancing when waiting to board.
- Please do not leave any trash (gloves, wipes, face coverings, etc.) in the seating area. A trash can will be provided and located at the front of the coach.
- Allow the driver to exit the bus prior to moving towards the exit.
- Enter and exit the bus in an orderly and respectful fashion, maintaining space between yourself and other passengers as much as possible. Please do not stand before the exit procedure begins.
- When unloading, remain seated and do not move forward until the other passengers in front of you are moving .
- Do not approach the driver while the bus is in motion unless there is an emergency.
- Follow all driver instructions.

Trans-Bridge has put protocols in place for maintaining clean buses:

- Disinfecting of 26 visible touch points including handrails, door latches, window release bars, driver area and restroom surfaces, including door handles daily. This is accomplished by total motorcoach sanitizing fogging and disinfectant wiping.

- Trans-Bridge Lines has replaced the standard main filters on our MCI motorcoaches with the MCI MERV 8 filter. The MERV 8 filter provides protection in capturing respiratory droplets and fine particles in the air.
- Passenger cabin air is completely exchanged with fresh, outside air approximately every ten (10) minutes. There is a separate air system for the driver cockpit area.
- Total motorcoach sanitizing fogging and wipe-down of 9 touch points during layovers daily.

We can all actively participate in taking precautions by following CDC Guidelines:

- Wash hands often and avoid touching your eyes, nose, and mouth with unwashed hands.
- Cover your mouth and nose with a cloth face cover when around others.
- If you are sick, think you may be sick, have been exposed to someone who is sick, or have a temperature, do not travel.

We are going the extra mile to keep our coaches clean and following directives based on current federal guidelines.
